GitHub, Git, Node.js, Homebrew, Google Drive, Mac OS Terminal

PROJECTS

Blood Bank System
Collaborated with students to create a JavaScript web application so users can donate blood to a blood
bank. Rendered components using React, allowing users to register and receive notifications.
Assembled page layouts, input forms, navigation bars, and displays for images.
Lucky Shrub
Designed a home page for a fictional garden design firm using HTML and CSS.
React Calculator App
Built a calculator app using React.js.
Figma Prototype
Developed a high-fidelity visual design prototype in Figma to reserve a table on the mobile version of the
restaurant's website using best practices of UX/UI.

EXPERIENCE

Duro UAS (Summer 2022)
- Used a water quality monitoring device to collect pH, dissolved oxygen, temperature, salinity,
  oxidation reduction potential, and electrical conductivity in water
- Visualized data using Microsoft Excel and Google Sheets
- Collected data, photos, and videos to create original social media content in collaboration with
  company leadership
